

21521413 - Lab 01

1. Chuyển về thư mục gốc:

```
> cd /usr/local
> ^Z
```

Chuyển đến thư mục /bin

```
>
> cd /bin
```

Chuyển đến thư mục người dùng

```
> cd /bin
> cd /usr
```

  /usr

2. Tạo cây thư mục

```
mkdir Myweb
cd Myweb
mkdir images databases scripts java
cd images
mkdir icon background animation
```

```
.. (up a dir)
</devtan/Documents/UIT/IT007/
▼ Myweb/
  ► databases/
  ▼ images/
    ► animation/
    ► background/
    ► icon/
  ► java/
  ► scripts/
```

3. Tìm files với extension

```
find . -type f \( -name "*.html" -o -name "*.class" \)
```

```
./Code/javascript/React/course/react-course/node_modules/@surma/rollup-plugin-off-main-thread
./Code/javascript/React/course/react-course/node_modules/@surma/rollup-plugin-off-main-thread
ner.html
./Code/javascript/React/course/react-course/node_modules/@surma/rollup-plugin-off-main-thread
tml
./Code/javascript/React/course/react-course/node_modules/terser/tools/props.html
./Code/javascript/React/course/react-course/node_modules/serve-index/public/directory.html
./Code/javascript/React/course/react-course/node_modules/lz-string/tests/SpecRunner.html
./Code/javascript/React/course/react-course/node_modules/sprintf-js/demo/angular.html
./Code/javascript/React/course/react-course/node_modules/tslib/tslib.html
./Code/javascript/React/course/react-course/node_modules/tslib/tslib.es6.html
./Code/javascript/React/course/react-course/src/index.html
./Code/javascript/webDev/html/index.html
```

Copy file đuôi html đến thư mục Myweb

```
cp ~/Code/javascript/webDev/html/index.html Myweb
```

```
> cp ~/Code/javascript/webDev/html/index.html Myweb
> ls
Myweb
> cd Myweb
> ls
databases  images  index.html  java  scripts
```

Di chuyển file từ thư mục Myweb đến Myweb/java

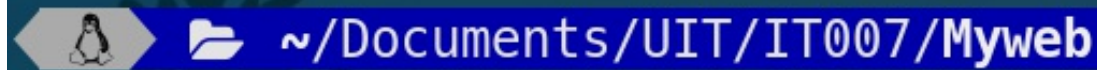

```
mv index.html java
```

```
> mv index.html java
> ls
databases  images  java  scripts
> cd java
> ls
index.html
```

5. Thực hiện xóa thư mục Myweb/scripts

```
rmdir scripts
```

```
> rmdir scripts
> ls
databases  images  java
```

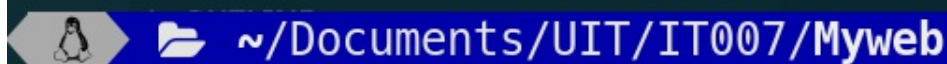

6. Thiết lập quyền truy xuất cho thư mục Myweb/databases

```
chmod 700 databases/
```

7. Tạo group hdh

```
sudo groupadd hdh
```

```
> sudo groupadd hdh
[sudo] password for devtan:
```

1 devtan **0** Myweb

⊗ 0 △ 0

Tạo user

```
sudo useradd --badname 21521413 -g hdh
```

```
> sudo useradd --badname 21521313 -g hdh
```
